✓ FIX APPLIED & VERIFIED

Lock Snapshot Bug Fix
CX.LOCKSNAPCHECKALL

Copy-paste error caused margin changes to be silently ignored after rate lock

Instance: **BE11146040** Field: **CX.LOCKSNAPCHECKALL** Method: **Encompass REST API PATCH**

⚠ THE BUG

The master lock snapshot check field referenced `[CX.LOCKSNAPLOAN11]` (Warn Interest Rate) **twice** and completely omitted `[CX.LOCKSNAPLOAN20]` (Warn Margin). Margin changes after lock were **never flagged**.

✓ THE FIX

Removed the duplicate `LOCKSNAPLOAN11` reference and added the missing `LOCKSNAPLOAN20` check. All 10 loan warning fields (11–20) now appear **exactly once**. Verified live on the server.

Fields Checked by CX.LOCKSNAPCHECKALL (Loan Section)

11 Int Rate | ~~11 Int Rate~~ | 12 Ln Amt | 13 Occ | 14 Doc Type | 15 Purp | 16 LTV | 17 CLTV | 18 FICO | 19 DTI | **20 Margin ✓**

■ Strikethrough = removed duplicate ■ Green = newly added field

What Changed — Line-by-Line

FIELD REFERENCE	BEFORE	AFTER
LOCKSNAPPROG 11–18	✓ All present	✓ Unchanged
LOCKSNAPLOAN11 (Warn Int Rate)	✓ Present	✓ Present ×1
~~LOCKSNAPLOAN11 (DUPLICATE)~~	~~Present ×2~~	~~Removed~~
LOCKSNAPLOAN 12–19	✓ All present	✓ Unchanged
LOCKSNAPLOAN20 (Warn Margin)	**MISSING**	**✓ Added**
LOCKSNAPPROP 11–14	✓ All present	✓ Unchanged
LOCKSNAPPROF18 (Short Funds)	✓ Present	✓ Unchanged

Why It Matters

AFFECTED LOANS

All ARM loans with margin data

RISK

Post-lock margin changes undetected

RESOLUTION

Margin now included in master check

How It Was Done

1. AI Audit found the bug
2. API Testing confirmed PATCH works
3. Fix Script built & validated
4. PATCH Applied HTTP 204 ✓
5. Verified GET confirmed fix
