Audit custom screens, plugins & SDK hooks	Roadmap aligned with ICE release cadence	WebFX screens, rules & condition migration	UAT, parallel run & compliance checks	Cutover with zero disruption to lending

Complex Custom Screens

Your bespoke desktop forms — rebuilt for Web with full fidelity.

- Input forms & calculated fields
- Multi-tab workbook layouts
- Role-based visibility rules
- Dynamic section rendering

Workflow Migration

Business rules, triggers, and automations — ported and verified.

- Loan-stage milestone rules
- Auto-assignment logic
- Plugin to WebFX conversion
- SDK hook mapping & testing

Enhanced Conditions

Condition sets, tracking, and auto-clear logic carried forward.

- Condition template migration
- Auto-clear rule conversion
- Document pairing logic
- Audit trail continuity

Migration at Your Pace. Aligned with ICE.

We sync your migration timeline with ICE's Encompass Web release roadmap — no surprises, no forced sprints. Your SDK tools stay running throughout the transition.

- ✓ Parallel desktop + Web operation
- ✓ Uninterrupted SDK integrations
- ✓ Compliance validation at every gate
- ✓ Phased rollout by user role
- ✓ Full regression testing per phase
- ✓ Post-go-live support & optimization

Your Roadmap Timeline set by your business needs, not vendor deadlines

Built by Experts 100+ years combined Encompass admin & dev experience

Zero Disruption Lending never stops — we migrate around your production

"MortgageTech doesn't just move your screens — they make them better."
